

# Mobility as the motor of sustainable urban transformations

SUMPs are driving the sustainable urban mobility shift. Yet there remain some gaps: realistic implementation pathways; links between mobility and other sectors in urban systems; and a lack of capacity and resources for SUMP implementation, especially in smaller cities.

**Enter CIVITAS SUMP-PLUS!**

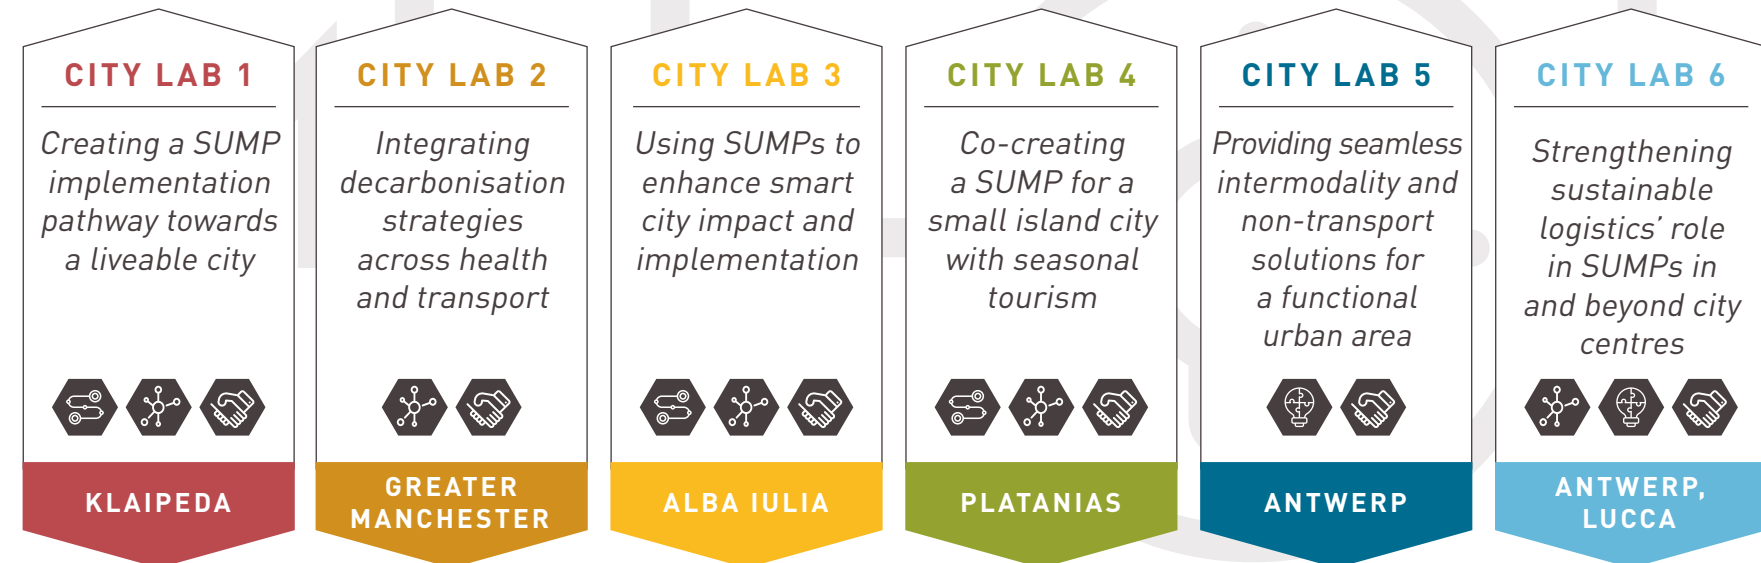

## WHAT?

Project activities focus on achieving four key objectives:

- OBJECTIVE 1**  
Develop context-specific mobility transformation pathways
- OBJECTIVE 2**  
Forge cross-sectoral links between transport, public services, and commerce
- OBJECTIVE 3**  
Implement and monitor cutting-edge mobility solutions
- OBJECTIVE 4**  
Create new forms of public-private partnerships and business models

## HOW?

The project works within co-creation laboratories in six cities across Europe.

FOLLOWER CITIES REPLICATE THEIR ACTIVITIES

BASED ON THE  
SUMP-PLUS  
CITY TYPOLOGY

## WITH WHOM?

- BUSINESSES
- CITIZENS
- CIVIL SOCIETY
- POLICY MAKERS

## KEY OUTCOMES:

- ✓ Resilient, place-centred cities that put citizens and their needs first.
- ✓ Improved cross-sector links that mean mobility requirements are included in public service delivery models.
- ✓ Tailored implementation pathways that make general guidelines realisable.
- ✓ Public-private partnerships that use data-driven planning to meet collective mobility objectives cost-effectively.

## MOVING BEYOND THE CITY LABS

The vast knowledge from the City Labs will be exploited by:

- DIVERSE AND PRACTICAL PUBLICATIONS AND OUTPUTS
- THE CITY CONSULT AGENCY'S TOOLS AND KNOWLEDGE TRANSFER ACTIVITIES

## THE RESULT?

SUMP-PLUS's legacy lives on through the next generation of researchers, practitioners and policymakers.
